NUTRITEC

Animal Feed Solutions

Since 2009, Nutritec has been consolidating its presence in the animal nutrition sector through a strategic approach based on consistent investments, infrastructure expansion, and strengthening of its brand in both the national and international markets. What began in Lajeado/RS with the production of animal origin meals has evolved into a solid structure, with its own logistics and operations in several regions of the country. Today, our headquarters are located in Estrela/RS, reaffirming our commitment to development and excellence.

Being a reference in the sector, Nutritec offers a broad and complete line of ingredients for animal nutrition. Our portfolio ranges from animal origin meals, oils, and fats to grains, meals, and vegetable oils, meeting the most diverse market demands. With a highly qualified technical team and a constant focus on innovation, we ensure superior quality, competitiveness, and solutions tailored to each client's needs.

In addition, we offer unique features that make producers' routines easier, such as the use of nutritional labels in our Vegetable Line, a visual tool that ensures practicality and accuracy in the selection of ingredients.

Nutritec's Nutritional Labels were developed to simplify the selection of the ideal feed for animals. The more labels a product has, the more complete its composition is. On the other hand, products with fewer labels indicate a formulation designed for specific needs. In this way, we deliver advanced nutritional solutions that are fully aligned with each producer's demands.

Pelletized Alfalfa

Oat Grain

Citric Pulp

Split Beans

Degummed Soybean Oil

Soybean Meal (flaked)

Soybean Meal (ground)

Corn Grain

Ground Corn

Soybean Hulls
(coarse and ground)

Swine Meat and Bone Meal 50%

Animal origin meals, oils, and fats with high nutritional value and strict quality control. Ideal ingredients for the production of feed intended for pets, poultry, swine, and other species.

With our own fleet, we deliver animal nutrition with speed, quality, and reliability throughout Brazil. We reach you wherever you are - in the industry or on the farm.

3/4 Truck: greater agility and precision in partial deliveries. Modern vehicles that reinforce Nutritec's commitment to efficiency and logistics quality.

Tanks: vehicles with a capacity of 18 to 38 tons. Ideal for bulk transport of vegetable and animal oils, offering safety, efficiency, and versatility in liquid logistics.

Feed Truck: equipped with 6 compartments, ensuring safe and separate transport of products, preserving nutritional quality and guaranteeing the best for your herd.

Bitrucks: Bulk Dump Trailers: deliver in bulk, bagged, or Big Bag, offering greater quality, speed, and ease of unloading, without the need for outsourced labor.

4th Axle Dump and Bulk Trailers: greater capacity, advanced technology, and top-to-bottom animal nutrition. We reach you wherever you are - at the feed mill or in the field.

Grain Receiving

Nutritec is the ideal partner for the **receiving, drying, and storage** of corn, wheat, and soy. With a complete structure and our own logistics, we collect the grains directly from the farm and simplify the producer's routine, offering speed, fair prices, and guaranteed payment.

NUTRITEC

Agricultural

Seeds and Fertilizers

Solutions that boost the productive potential of your crops. We offer selected seeds and fertilizers that ensure quality from planting to harvest.

We have a presence
throughout the entire country.
